

Announcing the VR-4 Audio/Video Switches

The VR-4 offers the following features:

Manual Mode:

- RS-232 and RS-485 interfaces (1200-155k baud)
- IR Remote operation
- ID codes for 8 units in one system.

Automatic Mode:

- Senses the video input and automatically switches it to the highest number input where video is detected.
- 9-24vdc power input
- Wall mountable
- Attractive metal housing

We're so confident **you** will like the VR-4, we will send one to you for a 2 week trial just by sending back the form below. If you decide to keep the VR-4, just pay the invoice, otherwise send it back for 100% credit. The only questions we're going to ask is why you didn't like it.

Please answer all questions to receive trial units.

Name _____

Company _____

Address _____

City _____ State _____ Zip _____

Phone: _____
